**CIRCULAR – 34**

**Precautionary Measures on spread of coronavirus**

Dear Parents,

As a school, we would like to be prepared against the spread of corona virus. We request you not to send your wards to school, if they have any symptoms of cough/cold/fever/throat infection. To be safe, it would be best the same measures are taken even if any adult at home has these symptoms. We have also advised all the school staff for the same.

At the school we will be increasing the physical checks. If we find a child with these symptoms, we will be asking the concerned parent to take the child home immediately. As a precautionary measure, we will start insisting all students to wash their hands properly during the breaks. Children are free to wear mask & bring hand sanitizer.

We are closely monitoring the situation & we will keep on updating you in case of any further change in the situation. It is best to be safe and take adequate precautionary measures. We expect your full co-operation.

Regards,

5.3.20
