we examine the work of the government at the state level. How does this take place in a democracy?

What is the role of a Member of the Legislative Assembly (MLA) and Ministers? How do people express their views or demand action from Government? We look at these questions through the example of health.

**SPL- Ch – 4**

**Being a boy or a girl is an important part of ones identity. The society we grow up in teaches us what kind of behavior is acceptable for girls and boys, what boys and girls can or cannot do.**

**We often grow up thinking that these things are exactly the same everywhere. But do all societies look at boys and girls in the same way? We will try and answer this question in this chapter. We will also look at how the different roles assigned to boys and girls prepare them for their future roles as men and women. We will learn that most societies value men and women differently. The roles women play and the work they do are usually valued less than the roles men play and the work they do. This chapter will also examine how inequalities between men and women emerge in the area of work**

## REVISION & TERM-1 EXAMINATION

HIS- Ch – 5  
Over the centuries important political,

social and economic developments had taken place.  
But social change was not the same everywhere,  
because different kinds of societies evolved  
differently. It is important to understand  
how and why this happened.

#### HIS -Ch- 6

people perform rituals of  
worship, or singing bhajanas, Kirtans or Qawwalis, or even  
repeating the name of God in silence, and  
noticed that some of them are moved to tears. Such  
intense devotion or love of God is the legacy of various kinds of  
bhakti & Sufi movements that have evolved since the 8th century.

We will now learn about the places in the world where  
people have learned to cope with extreme harsh  
temperatures; in some places as hot as fire and some as  
cold as ice. These are the desert areas of the world. These  
are characterized by low rainfall, scanty vegetation and  
extreme temperatures. Depending on the temperatures  
there can be hot deserts or cold deserts. The people  
inhabit these lands wherever little water is available to  
practice agriculture.
