Jindal Vidya Mandir, JSW Hill Side Township
Weekly Test-11(2024-25)

Class: V/Sec:

Sub: English

Duration: 45 min

Max Marks: 20M

General Instructions:

- ● **All questions are compulsory**
- ● **Write neat and legible handwriting .**

1.Read the following unseen passage and answer to the questions.

Trees are often called the lungs of the Earth because they play a crucial role in producing oxygen and absorbing carbon dioxide. They provide shelter and food to countless species of animals and insects. Additionally, trees help in maintaining the balance of our ecosystem by preventing soil erosion, reducing pollution, and regulating temperature.

In urban areas, trees provide shade and improve air quality, making cities more livable. They also offer a peaceful environment for people to relax and enjoy nature. Without trees, life on Earth would be difficult, as they are essential for clean air, water, and soil.

Planting more trees is one of the simplest yet most effective ways to combat climate change. By taking care of the trees around us and planting new ones, we can contribute to a healthier and greener planet for future generations.

Answer the following questions 1x5=5

1.Why are trees called the lungs of the Earth?

2.How do trees help maintain the balance of our ecosystem?
