From Principal Desk –

Make short and small Goals!

The word **GOAL** can be best understood as ‘Get oriented to achieve laurels!’

Success is the sum total of efforts taken day in and day out. In order to achieve any long term goal, it is important to align some short and specific goals which would help in achieving the long term goal. If you desire to be successful, you must focus on those small yet important tasks to be completed on time.

Do not pile up your work as that would built stress and confusion. In addition to this, Plan and participate in school activities so that you can make best use of time and energy and grow confident and focused. The saying “Nothing great was ever achieved by only sitting still” reveals the importance of hard work and you must ensure to take small efforts on daily basis to achieve the big Goal!

Best wishes for yet another new academic session.

Safai Bank Project Experience -

I would like to say you a big thank you to all teachers and JSW Foundation for giving us the great opportunity in the Safai Bank project. As we know plastic pollution is spreading through to the environment like Wildfire widely. Dumberd plastic is consumed as food materials by animals such as cows. This causes indigestion and other breathing problems. In this activity students were responsible towards the society/Nation to protect our “Mother Earth”. We also got a chance to win exciting prizes as well. I really like this activity and the effort made by the students. I did not faced any problems in collecting plastic, it was so easy to collect it, but I I really felt bad and sad after thinking that, as how the numbers of plastic we found from our home, then what will Be the situation of our mother Earth. It takes drop by drop to fill a pitcher, similarly this small steps taken towards the Earth to save our Earth, so that we can make our Earth plastic polluted free. I hope such types of project will continue for our rest of the life.

Students Voice

Proud Participant of Safai Bank -

I am feeling very proud that I did it for my country.
 I collected plastic bags nearly 1,100 and still collecting.
 The purpose of this activity is to save us, animals and water bodies. We all know that because of plastic, mostly cows and turtles are getting affected, the reason behind it is that the animals don't have sense, what to consume and what not. But we have. Therefore, it's a humble request to everyone, please do not throw the plastic away, give it to recycling or use and reuse it in your homes. These kinds of simple changes can save everyone. One thing more, do not expect that nature will consume those all plastic and garbage which we throw, It will surely give it back. Recent example of it is the cyclone Tauktae. So please do not throw plastic and don't allow others too. Adopt the habit of saving yourself as well as the world. Try to be an inspiration.

My School in Action

World Environment Day -

It is rightly said that " Our earth is our habitat and our home also and so our environment." To commemorate this special day, the students and teachers of JVM Kalmeshwar celebrated World environment day on 5th June 2021 virtually on zoom platform wherein children shared information about their work. The students took help of their parents to make feeders / water pot for birds or other animals. The students took pledge to feed animals with different types of seeds and food to the birds and stray dogs. They used eco-friendly materials to prepare pots and utensils to arrange drinking space for animals near their house. All these activities were made possible by the efforts and great interest among the students. Participation of parents was also seen in this noble activity. It was implemented by the students under the guidance of their respective class teachers.

The purpose of Environment Day celebration is to create awareness among the students to nurture the Environment and to take care of the animals as this is the only planet we have, to live where empathy acts like a virtue for all.

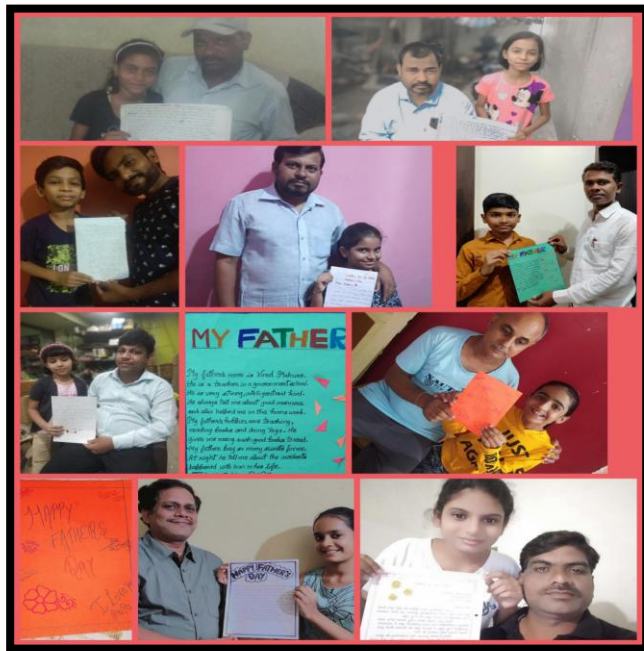

Father's Day -

Father's Day is a celebration honouring fathers and celebrating fatherhood, parental bonds and the role of fathers in shaping the lives of their children.

Jindal Vidya Mandir, Kalmeshwar celebrated the day in their own special way by asking students to honour their fathers, their superheroes. The spirits of young students are not dampened during this difficult time, as it was evident from the way they celebrated Father's Day, depicting their unending love and gratitude for their fathers. The students made cards and written essays for their fathers as an expression of love and respect towards them and clicked a picture to freeze the memory. It was a memorable experience as we encourage children to observe everyday as a Father's Day.

“The power of a dad in a child's life is unmatched.”

JUNE 2021

International Yoga Day -

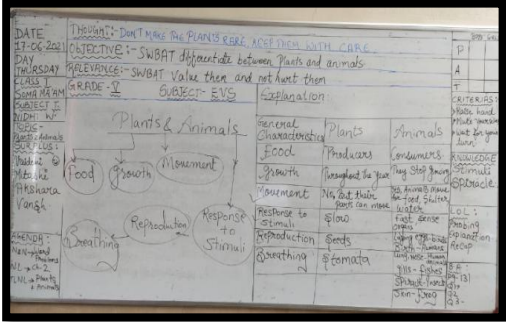

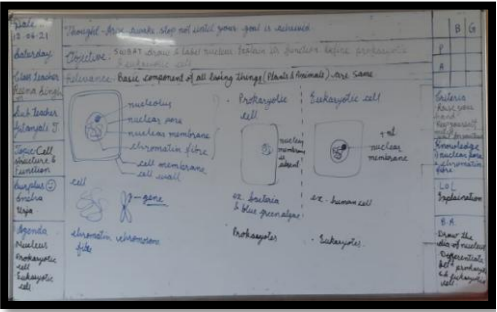

Jindal Vidya Mandir, Kalmeshwar celebrated the 7th International Yoga Day virtually on 21st & 22nd June 2021 with the enthusiastic participation of students and staff members. The celebration was a part of global commemorative efforts of international day of yoga initiated by the government of India and the United Nations organization. The yoga day celebration was conducted by Mr Govinda Pal and Mr Nikhil Wahane under the able guidance of the Principal Mrs C. Pallavi. The celebration commenced with Mr Govinda's instructions followed by yoga day prayer played by Mr W.P. Aditya Rao. The students explored and enjoyed the bliss of doing yoga and realised its importance in life through various exercises and Asanas i.e. initial stretches, Tadasana, Vajrasana, Bhadrasana, Kapalabhati, Pranayama, Surya Namaskara etc. the students learnt how to remain de-stressed, flexible and calm by developing physical and mental strength.

Board Protocol

The design of the board prompts the teacher to explicitly articulate and make visible how each lesson is designed to catalyse Relevance, Rigor & Relationship. As per the schedule time table, every day Board Protocol practices is going on in regular online classroom and teachers are presenting themselves in front of whole class. Before presenting in front of class, teachers are sharing their plans with RLC coordinators and doing dry runs if it is required. Timetabling of the given process is helping teachers to practice and imbibe the habit. Reflection and feedback further clarifies the doubts and queries and strengthen the understanding and confidence. The purpose of Board Protocol not just the lesson plan but also serves as a visual cue that reminds us to intentionally notice the learner. By responding to the various sections on the board, students become active participants in the lesson and not just passive listeners.

Conglom

Conglom is a word which is taken from Conglomerate which means "Coming Together", where students get space to talk about their feelings and experiences. In this pandemic situation as all the schools are operating virtually, we thought a step ahead and planned virtual Congloms. Teachers planned different activities like riddles, puzzles, paper folding activities, etc to make congloms enjoyable by creating a conducive learning environment. Congloms helped to create awareness among students about health, safety, eating habits, being grateful, think before talking, and much more. The given informal interactive session is a favourite to all.

Parents Feedback

I am very happy to be a part of the Safai Bank activity. Because of this activity my son got an opportunity to contribute for the cause of environment. He could collect about 180 plastics. (Polythene bags chocolate wrappers, plastic containers, etc. These plastics wastes could pollute my surrounding. So I am feeling very happy and proud. Also, I would like to continue this habit to keep the environment clean. Thank you.

Mrs.Rashmi Korake
Parents of Rudra Korake
Grade - II

Safai Bank included collection of plastic, which was indeed an easy task . My child told all our family members to collect any plastic item which comes on our way, and excitedly everyone had a great support. She followed all the procedure of collection.

I.e. Collected – Cleaned – Washed – Dried and Stored.

This activity keeps her busy in her spare time as well as made us realize the importance of single use plastic.
